

WhaleTV Lock Management System

User Manual

WHALE TV
CONFIDENTIAL

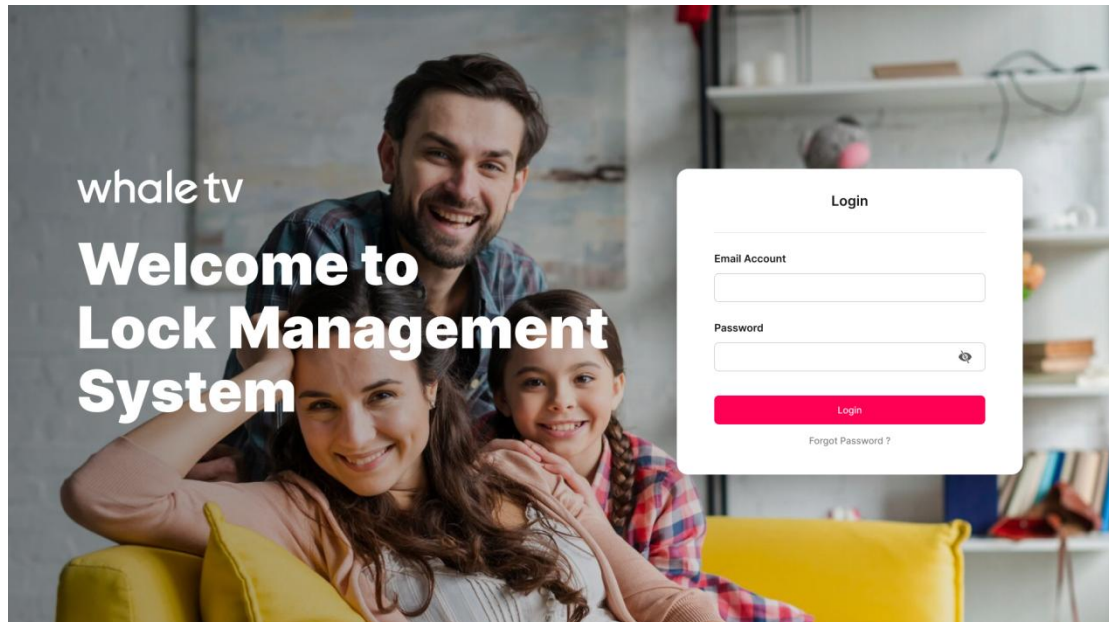

Authors – Kelly

Document Version – v1.0.0

Date – 22/Jan/2026

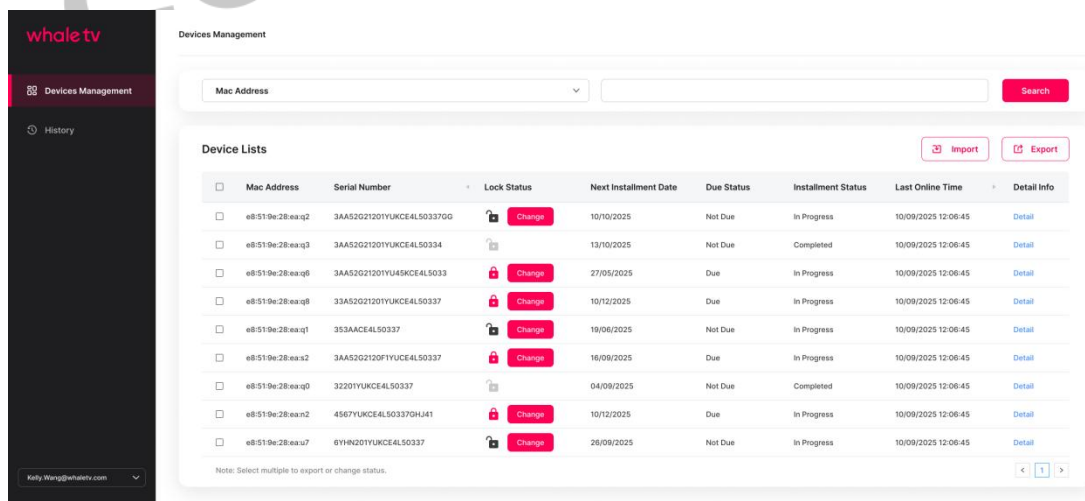

1. Login

1. Go to <https://lockservice.whaletv.com/login> to log in.
2. If you do not have the account, Please provide the necessary information to the contact to request your account.

2. Device Management

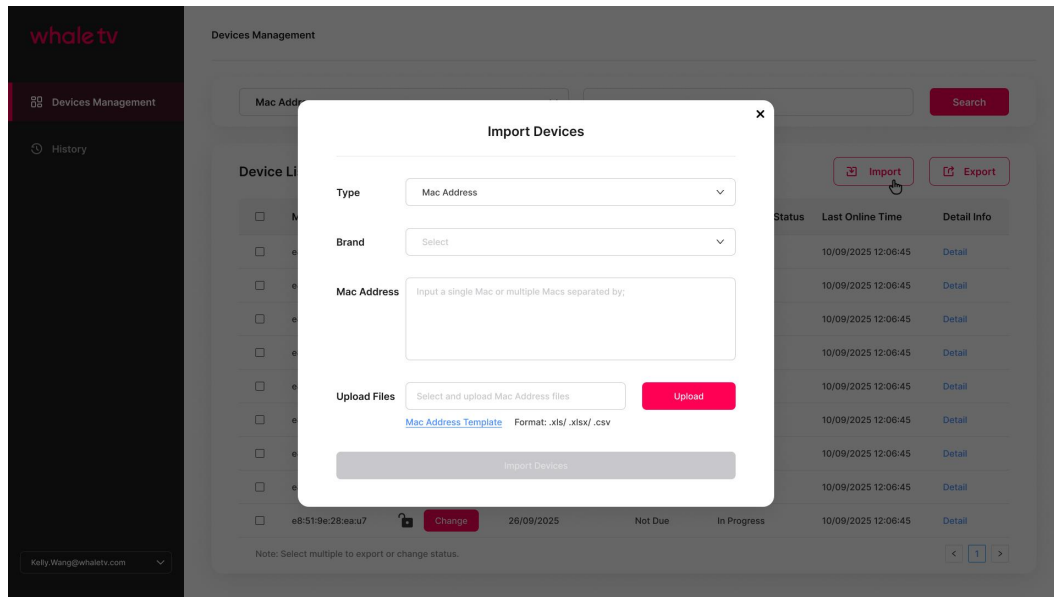

In Device Management, operators can manage all devices, including importing devices, exporting device information, locking/unlocking devices, viewing details, editing device information, generating PIN codes, clearing devices, etc.

2.1 Import Device

1. Import Device by Mac Address:

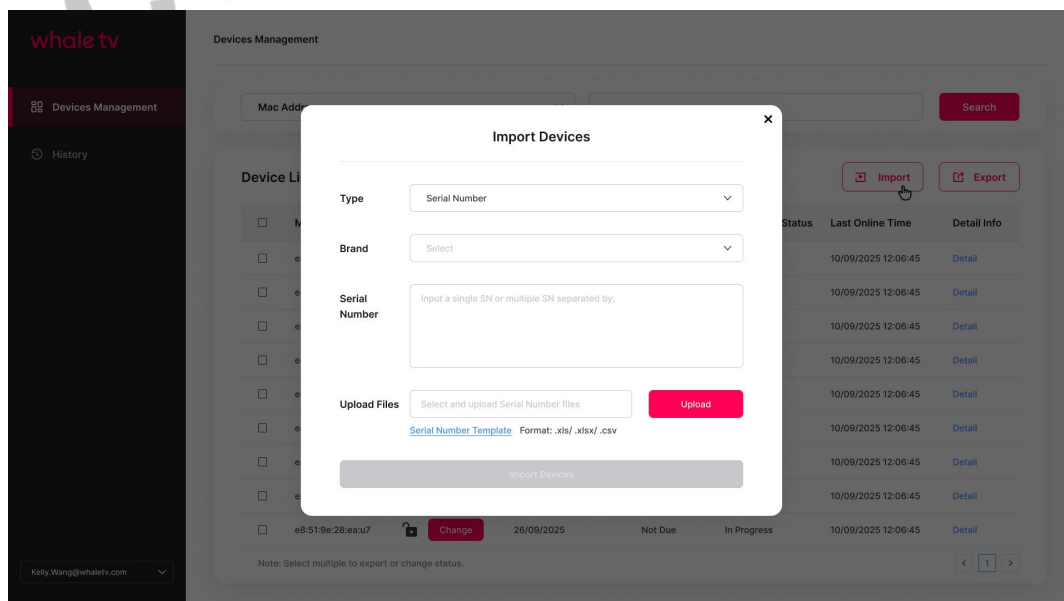

1. Select Type: Mac Address.
2. Choose the Brand of the devices to be imported.
3. Enter/Upload the MAC address of the devices to be imported.
4. After clicking Import Devices, the import results will be displayed.

2. Import Device by Serial Number:

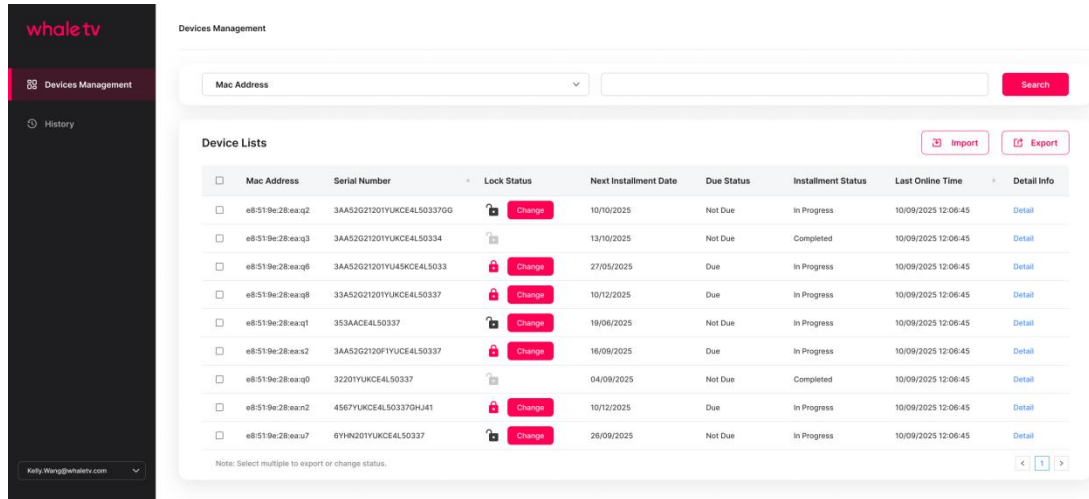

***Prerequisite: Serial Number burned into the device.**

1. Select Type: Serial Number.
2. Choose the Brand of the devices to be imported.
3. Enter/Upload the Serial Number of the devices to be imported.
4. After clicking Import Devices, the import results will be displayed.

2.2 Change Lock Status

After the import is completed, find the device you want to lock in the Device List and check its Lock Status. You can click the “Change” button to lock or unlock the device.

The screenshot shows the 'Devices Management' page. On the left is a sidebar with 'Devices Management' and 'History' tabs. The main area has a search bar for 'Mac Address' and a 'Search' button. Below is a 'Device Lists' table with columns: Mac Address, Serial Number, Lock Status, Next Installment Date, Due Status, Installment Status, Last Online Time, and Detail Info. Each row has a 'Change' button next to the Lock Status. At the bottom right, there are 'Import' and 'Export' buttons. A note at the bottom says 'Note: Select multiple to export or change status.'

2.3 View Details

On the Details page, operators can view and edit Device Info, generate PIN codes and view PIN code usage history, and clear the device.

1. View/Edit Device Info:

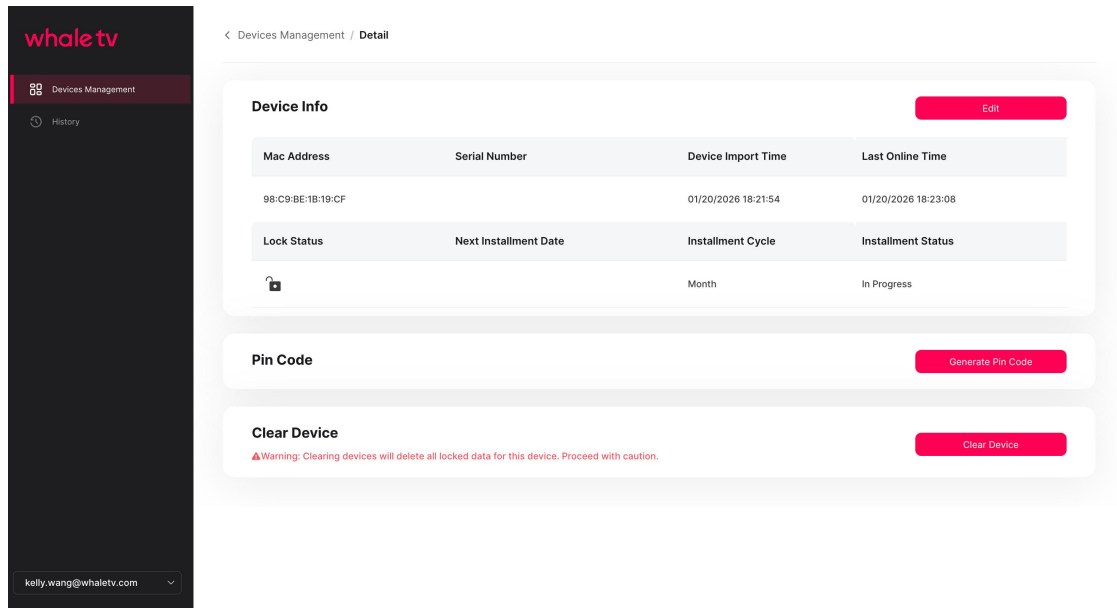

- 1.View Info:Mac Address, Serial Number, Device Import Time, and Last Online Time.
- 2.View and Edit Info: Lock Status, Next Installment Date, Installment Cycle, and Installment Status.

1/ Lock Status: Change the device Lock/Unlock status.

2/ Next Installment Date: The default value is empty. Operators can manually enter the next installment date for the device. When this date is reached, the device will automatically change from unlock to lock.

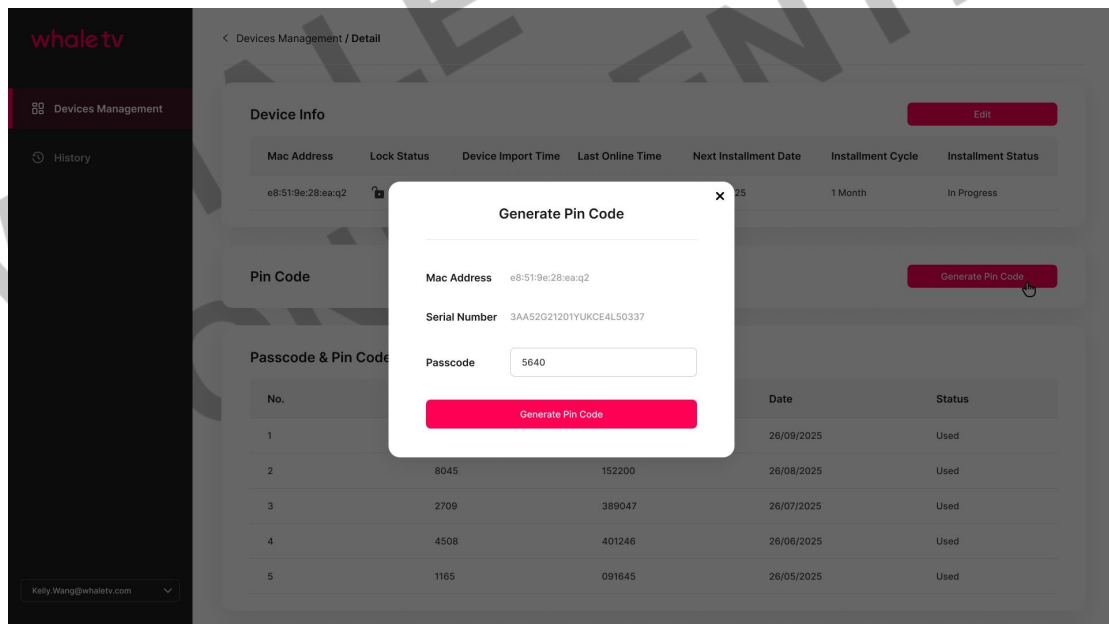

3/ Installment Cycle: The default value is empty. Operators can manually enter the installment cycle.

4/ Installment Status: The default value is In Progress. If the device has no installment plan or the installment payments have been completed, it can be changed to Completed, and the device will no longer be locked.

2. Pin Code:

1. Generate Pin Code: When the device is locked, enter the required information according to the instructions on the device lock screen to obtain an unlock PIN code.

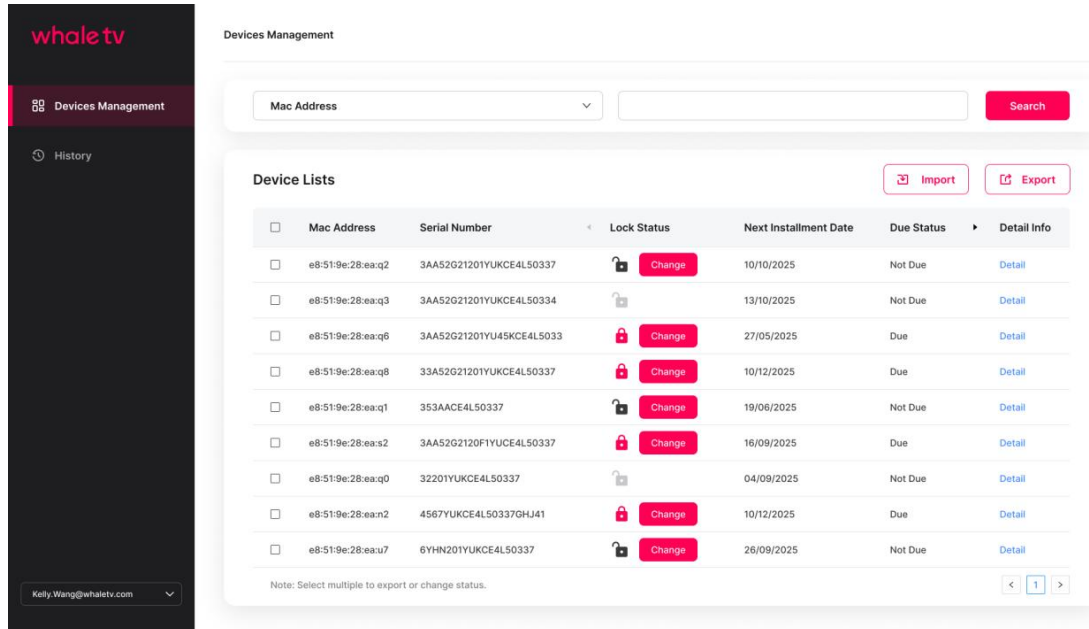

2. PassCode & PinCode History: Records of PassCode and PIN codes that have been used for this device.

3. Clear Devices:

*Clearing devices will delete all locked data for this device, proceed with caution.

2.4 Export Device

On the Device List page, operators can manually select devices to export device information.

Q&A:

1. When the device is locked from the WhaleTV Lock Management System Portal, the lock screen will be displayed on the device. Please follow the on-screen instructions to contact support and unlock your device.

2. If the TV is not registered in the portal, it will show a “TV is not activated” lock screen. The customer should contact sales point to activate the device. Once the MAC Address/SN is registered in the Lock Management Portal, the customer can click “Retry” to unlock the TV.
